## SUMMARY

Software Engineer experienced in LLM-powered data classification and mapping, backend APIs, and ETL pipelines. Hands-on experience with Python, FastAPI, OpenAI models, Node.js, TypeScript, and AWS for property-data integrations and internal services.

## EXPERIENCE

**Junior Software Engineer** *Sep 2025 - Present*

*Radix Software Inc* *Prishtinë, Kosovo*

- Implemented OpenAI-powered classification and clustering workflows for property data, using prompt engineering to support data processing.
- Contributed to an internal mapping platform that streamlined scraped-data processing and reduced reliance on external engineering teams, implementing AI-driven data matching and mapping as well as automated scraper generation
- Built and deployed web scrapers, ETL pipelines, and third-party property API integrations, helping expand platform coverage toward 14M+ multifamily housing units.
- Contributed to a FastAPI service exposing Amazon S3 data to downstream services within the scraping platform; developed backend services and REST APIs with Node.js and TypeScript.

**Software Engineer Intern** *Apr 2025 - Aug 2025*

*Radix Software Inc* *Prishtinë, Kosovo*

- Developed RESTful and GraphQL APIs using Node.js and MongoDB, and implemented unit tests for services, mappers, and controllers.
- Collaborated in an eight-member Agile team on feature development and bug fixes, managing work in Jira.

## SELECTED PROJECTS

**AI Agentic Harness** | Code

*Python, Ollama, Qwen, Model Context Protocol*

- Built a Python agent loop from scratch using a local Qwen model through Ollama, with file tools and persistent memory across sessions.
- Integrated configurable MCP servers over stdio, using asynchronous session management and dynamic tool discovery to extend the agent's capabilities.

**Snake 97** | Code | Live demo

*TypeScript, React, Cloudflare Workers, D1 SQLite*

- Built a browser game with responsive controls, three difficulty levels, and database-backed game history and leaderboards.
- Implemented server-side replay validation and repeat-safe score saving, with six engine tests covering deterministic behavior, growth, speed, collisions, and winning.

## EDUCATION

**University of Pristina** *2022 - 2025*

B.S. in Computer Science | GPA: 9.11/10

**Languages:** Albanian (native), English (proficient)

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, SQL
**Data & Scraping:** Playwright, BeautifulSoup, Parquet, Databricks, lxml, Requests
**Backend and Databases:** FastAPI, Node.js, GraphQL, MongoDB, MySQL, PostgreSQL, DuckDB
**Cloud and Tools:** AWS (Lambda, Fargate, S3, DynamoDB, SQS, EventBridge, IAM), Terraform, Docker, GitHub Actions
**AI/LLM:** OpenAI API, Pydantic AI, Claude Code, Codex, spec-driven development
**Test & Quality:** pytest, mypy, ruff, TDD, unit tests, ADRs
