

Mustafë Ismajli

Software Engineer | Backend Systems, Automation & Python
ismajlim26@gmail.com | Kosovo | github.com/Mustaf-Is | LinkedIn

PROFILE

Software engineer experienced in APIs, web scraping, backend integrations, data pipelines, system automation, and practical AI workflows. I build maintainable software that turns messy real-world processes into reliable systems while continuing to deepen my Python expertise.

EXPERIENCE

Software Engineer I - Radix Inc. | September 2025 - Present

- Develop and deploy web scrapers that extract, clean, and integrate large-scale data from diverse sources.
- Engineer data pipelines that automate ingestion workflows, reduce manual effort, and accelerate data refresh cycles.
- Implement AI-assisted data categorization and clustering workflows using OpenAI models.
- Develop APIs and backend product features with Node.js and TypeScript.

Software Engineer Intern - Radix Inc. | April 2025 - August 2025

- Developed RESTful and GraphQL APIs with Node.js and MongoDB for scalable web applications.
- Implemented unit tests for services, mappers, and controllers to improve reliability and maintainability.
- Collaborated in an eight-person cross-functional team using Scrum, Kanban, and Jira.

TECHNICAL SKILLS

Backend & automation: Python, Node.js, TypeScript, Express.js, Java, Spring Boot, REST, GraphQL, web scraping, data pipelines

Data & infrastructure: MongoDB, MySQL, RabbitMQ, Docker, Azure, Git, GitHub

Frontend: React, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap

Quality & workflow: Unit testing, Jest, Jira, Scrum, Kanban

EDUCATION

University of Pristina - B.S. Computer Science

2022 - 2025 | GPA: 9.11/10

Skënderbeu High School - High School Diploma

2019 - 2022 | GPA: 5.0/5.0

COURSEWORK

Front-End Development - Cactus Education

May 2022 - July 2022

Built foundational web-development skills in HTML, CSS, JavaScript, and responsive layout design.

Web Development Professional - ICT for Kosovo's Growth

October 2024 - January 2025

Studied HTML, CSS, Bootstrap, JavaScript, jQuery, responsive development, and UX/UI design with Figma.

HACKATHONS

Data Hackathon - Raiffeisen Bank | November 2024

- Collaborated on a real-time ingestion pipeline and ETL workflow using online weather data to extract features for weekly weather prediction.

AI Hackathon - JunctionX ITP Prizren | May 2025

- Co-developed CivicPulse, a platform for citizen suggestions and voting that helps prioritize improvements to digital public services.

LANGUAGES

Albanian - Native | English - Proficient

INTERESTS

Artificial intelligence, applied mathematics, hackathons, traveling, and sports
