Summary

Motivated Software Engineer experienced in building backend systems, data pipelines, and AI-driven automation. Implemented LLM-based solutions (OpenAI) for data categorization and clustering and developed scalable web scraping and ETL pipelines. Experienced with Python, FastAPI, Node.js, TypeScript and cloud technologies (Azure & AWS); eager to design and deploy production-ready, AI-powered applications while continuously expanding my technical skills and growing as a software engineer.

Work Experience

Software Engineer Intern

Apr 2025 – Aug 2025

Radix Software Inc • Prishtinë

- Developed **RESTful** and **GraphQL** APIs using **Node.js** and **MongoDB** to support scalable web applications.
- Implemented unit tests for services, mappers, and controllers to ensure code reliability, maintainability, and overall quality.
- Collaborated within an 8-member cross-functional Agile team following **SCRUM** with Kanban practices; managed tasks and workflows using **JIRA** and contributed to both feature development and bug resolution.

Junior Software Engineer

Sep 2025 – Present

Radix Software Inc • Prishtinë

- Helped scale platform coverage toward **14M+ integrated multifamily housing units** by building and deploying web scrapers, data pipelines, and third-party property API integrations across diverse U.S. sources.
- Contributed to an internal mapping platform that streamlined scraped-data processing and reduced reliance on external engineering teams, implementing AI-driven **data matching and mapping** as well as automated scraper generation.
- Implemented AI-driven data classification and clustering workflows using **OpenAI models and prompt engineering**, improving the consistency and throughput of data-processing workflows.
- Contributed to the design and development of an internal **FastAPI** service that exposes data stored in **Amazon S3** to downstream services within the scraping platform.
- Designed and developed backend services and **REST** APIs using **Node.js** and **TypeScript**, supporting core platform functionality and scalable data workflows.

Education

University of Pristina

2022 – 2025

Computer Science | Bachelor of Science (B.S.)

GPA: 9.11/10

Skills

BACK-END DEVELOPMENT

FastAPI, TypeScript, Node.js

FRONT-END DEVELOPMENT

HTML, CSS, JavaScript, Bootstrap, Tailwind, ReactJS

AI & DATA

Python, Databricks, LLMs, OpenAI, Prompt engineering, Data Pipelines, ETL, Web Scraping

TOOLS & ENGINEERING

Git & GitHub, CI/CD, GitHub Actions, Docker, AWS, Azure, MongoDB, MySQL, DuckDB, Agile, Scrum

SOFT SKILLS

Teamwork, Critical thinking, Adaptability, Time management, Creativity

Languages

- Albanian (Native Speaker)
- English (Proficient Speaker)

Interests

Traveling, Sports, Artificial Intelligence, Hackathons, Applied Mathematics
